SPL's Houston, TX Facility Receives NELAP Accreditation to Perform TO-15 Analysis

Houston, TX – August 10, 2006 – SPL, Inc. a privately held leading provider of environmental/hydrocarbon testing, gas - liquid measurement, and allocation accounting services company recently was awarded its NELAP accreditation in the Houston, Texas laboratory to perform Toxic Organic analysis for Volatile Organic compounds using method TO-15.

Founded in 1944 as a gas and liquid measurement company, SPL has grown into a worldwide leader of environmental testing services. The environmental testing division performs tests in its three (3) environmental laboratories located in Houston, TX, Lafayette, LA, and Traverse City, MI to detect trace level organic and inorganic contaminants in soil, water, waste, and air samples. SPL participates in over fifty (50) different lab programs all over the United States and South America.
