Press Release

SPL Inc. opens a new center of excellence for manufacturing.

Our new manufacturing business unit (MBU) is now available for metering, skid, and associated systems integration services.

Lancaster, TX, November 15, 2006: SPL's new MBU division, located at 101 Industrial Street, Lancaster, Texas 75134 officially opened for business on November 15th, 2006. Clients traveled from across the country to be a part of this exciting event, and the feedback was fantastic.

SPL has assembled a highly skilled team of individuals and state of the art manufacturing equipment and processes for the purpose of manufacturing meter tubes (any primary meter device type, liquid or gas), skids (measurement-gas & liquids, analytical, and small separation projects), etc.

SPL can now offer you our standard designs or build to meet your specific requirements. Our facility is also set up for rebuilding of fittings and tubes of any diameter.

Our new 44,000 FT² facility hosts stocked meter fittings, meter runs, basic SPL designed skids, and parts (valves, fittings, seal rings, orifice plates, communications, solar systems, batteries, charts, pens, etc.).

Our MBU also performs systems integration and specialty engineering.

In addition, our Lancaster facility hosts a new hydrocarbon laboratory and field services operating group that is supplying local Barnett Shale and surrounding areas with expanded measurement, analysis, SCADA and Flow Assurance related services.

Our new facility was selected for ease of shipping any product deliverable to the US market. We are just off Hwy 45 (North/South) and Hwy 20 (East/West).

Please contact Fred Wenzel (713-660-0901), or our MBU Manager Mr. Kenneth Reed (972-224-5111) for a facility tour, or your local sales professional to discuss your project requirements, or to help you solve your measurement and analysis problems.

For Release 9 a.m. CDT, November 15, 2006

SPL Manufacturing Business Unit Capabilities:

- Certified welders for 2 inch through 24 inch pipe (API 1104 and ASME Section 9)
- State of the art computer controlled welding machines
- Patented manufacturing fixtures for consistent high precision meter tube layout
- Manufacturing processes set up for efficient production rates and high quality assemblies
- Precision honing and internal surface grinding to tight tolerances (<0.010" inlet to outlet out of roundness). Automated honing/grinding machine can handle up to 20 inch internal diameters with 20 foot single pass machining to meet or exceed API tolerances.
- Drilling capabilities to 3 inch
- Machine shop capabilities for any project
- Sandblasting and Painting
- Hydrostatic testing (0 - 5,000 psig)
- Rebuilding service for old or sub-standard meter tubes and fittings (we buy old units)
- Stocked honed and non-honed pipe
- Extensive parts supply
- SPL design engineering services
- Meter tube assemblies for any type meter (orifice, turbine, PD, coriolis, rotary, ultrasonic, etc.).
- Full skid manufacturing capabilities
- Small separator assemblies and packaging
- Regulation station design, manufacturing and assembly
- Field welding and assembly services
- Field meter tube inspection and servicing
- Orifice fittings offered from; Daniel, Canalta, TMCO, etc.
- On-site field services group and full hydrocarbon laboratory offered by our on-site Hydrocarbon Field Services and Laboratory group
